March 2010	MANAGING UNDER PRESSURE
Cover feature	Property and facilities management From Dubai to Dundee, the bulk of new build developments born of the building boom of the early- to mid-noughties are now online. The pressure is on to make sure occupancy levels are high – we look at the innovative ways to improve property and facilities management.
April 2010	LAND AND RESOURCES
Cover feature	Land management Land tenure in developing countries and a properly functioning land market is a prerequisite for any successful economy and therefore a key tool in poverty alleviation.
May 2010	GLOBAL FINANCE AND EMERGING ECONOMIES
Cover feature	Corporate finance and fund management With developers unable to rely on traditional sources of investment and increased bank regulation halting private equity property funds, how come the property world continues to turn? Plus, we look at which 'emerging economies' are emerging best from the global downturn.
June 2010	TO THE EXTREME
Cover feature	Designing to extremes What do you do when you want to build a school in a desert? Can you build underwater? How do you project manage at -40°C? Is there anywhere on Earth where property professionals can't operate? We go in search of the extremes of the property landscape and find RICS members hard at work.
Jul/Aug 2010	ON THE MOVE
Cover feature	Transport Infrastructure development was once heralded as the only way out of recession for the property and construction sectors. Have the vast transport projects around the globe generated the jobs the politicians promised? We look at some of the world's most ambitious road and rail projects.
Sept 2010	POLITICS & PLANNING
Cover feature	All change Governments love to make promises. We look at some of the policies and promises that haven't been kept, ask members what policies they would like to see, and focus on the innovations that are working around the world.
Oct 2010	HERITAGE & CONSERVATION
Cover feature	Preserving the past What are the hazards involved in project managing a complex conservation project? From restoring St. Paul's Cathedral to conserving the Great Pyramid, members are protecting the world's most famous structures for future generations.
Nov/Dec 2010	WORLD ENERGY
Cover feature	Rise of the alternatives With days to go until the end of 2010 and a year on from the Copenhagen Climate Conference, are governments hitting their low carbon targets?
